INTERNATIONAL CONFERENCE & TASK FORCE ON REACTIVE NITROGEN WORKSHOP

Innovative Solutions for Sustainable Nitrogen Management

June 26-28 & 29-30 in Aarhus, Denmark, 2017

Sustainable management of nitrogen (N) is a key issue for the bio-economy, environmental protection, and human well-being. Innovative, research based solutions are at the nexus of sustainability and new N management approaches are therefore called for, and is the background for the dNmark Research Alliance to invite to this international conference, including the following key topic areas:

- New <u>technologies</u> for improved N management and efficient food chains
- Local N solutions: watersheds, landscapes, ecosystems, communities and farming systems. Involvement & interactions with stakeholders
- 3. <u>Health</u> impacts challenges: drinking water and air, human and public health
- Targeted N <u>regulation</u>: costs, benefits and incentives, surface waters, ecosystem services, distribution, potentials, conflicts and legal aspects

- 5. Sustainable consumption and N effects
- N <u>monitoring</u> for emission estimates and trends assessment

The conference will focus on solutions at different scales and places in the N management chain, and participants are invited to submit abstracts to the conference proceedings, and potential special issue papers. In addition to the conference, a full day of excursions are offered to showcases for sustainable N management in Denmark.

In addition to the conference, the UN-ECE Task Force on Reactive Nitrogen workshop is hosted June 29-30. Interested can join this meeting as well, and follow discussions in the related expert panels on nitrogen mitigation, budgets, food and health etc.

For more information visit **SustainableNconference.dNmark.org**

PROGRAM OUTLINE

June 25: Welcome to Aarhus

Evening Ice-breaker

June 26-27: International conference on Sustainable

N solutions

June 28: Whole day excursions and/or possibility

for break-out groups

June 29-30: UN Task Force on Reactive Nitrogen

meeting, incl. expert panel sessions

VENUE

Aarhus University, Intitute of Advanced Studies aias.au.dk

IMPORTANT DATES

Website open for registration: *Jan 5*Abstract submission deadline: *Feb 15*(notification of acceptance Mar 31)
Early bird registration deadline: *Apr 21*

REGISTRATION

You can register separately for:

The conference, June 25-27 (incl. welcome reception Sunday, conference dinner Monday, and a full sustainabilty conference package.

The one day excursion, June 28.

The Task Force on Reactive Nitrogen workshop and expert panel meetings, June 29-30.

For more information about registration, booking of hotels, abstracts, side events etc., visit the conference home-page at SustainableNconference.dNmark.org or mail: DNMARK2017@agro.au.dk.

VISIT AARHUS

With this conference you will have the chance to visit Aarhus, the European Cultural Capital 2017, ranked one of the most liveable 2nd cities of the world, and listed by Lonely Planet as a "must see in Europe", and the only Danish city at the Food Trail gastronomic world map. Visit among others the harbour front Climate Planet, and experience the nexus between sustainability, nitrogen use in reality, with sustainability as one of the cultural city pillars.
